This fact sheet is a quick reference on demographics and the use of services by people with traumatic brain injury (TBI).

The VA PRC Traumatic Brain Injury Model Systems National Database is a prospective, longitudinal multi-center study which examines the course of recovery and outcomes following the delivery of a coordinated system of acute neurotrauma and inpatient rehabilitation within the VA Polytrauma centers.

The Database includes large scale follow-up at years 1, 2, 5, and every 5 years thereafter. As of December 2020 the database contained information on 1,454 persons with TBI. For further information, visit our Web site at; https://www.polytrauma.va.gov/PolytraumaCenterDatabase/index.asp

A 2020 Profile of Persons with TBI who Received Inpatient Rehabilitation at a VA Polytrauma Center

Persons with Traumatic Brain Injury at Time of Injury
